Finally a dental benefit that makes sense!

If you do not have dental Insurance, or if you have reached your annual maximum on your insurance plan, **THIS IS FOR YOU!!!**

Enclosed on the second page is information regarding a new and exciting program that saves you and your family on all dental costs and if you have dental insurance it will free you from the confining financial restrictions of dental insurance (if you have dental insurance and you have reached your insurance maximum coverage), you can now receive dental treatment without premiums, deductibles, coverage maximums, Insurance company denials of treatment and more importantly no more dictation from Insurance companies regarding your dental health.

If you do not have dental insurance, this is even better because you will never have to deal with monthly premiums, deductibles and more importantly, you will never have to deal with interference from a dental insurance company, as you will be the one in the drivers seat to control any and all dental care you receive.
